EDUCATION

Yale University, New Haven, CT

December 2025

- *B.S., Computer Science*
- *Coursework:* Computer Graphics, Systems Programming, Computer Architecture, Linear Algebra, Discrete Mathematics, Software Engineering, Automated Decision Systems, Object Oriented Programming, Machine Learning, Fullstack Programming

TECHNICAL SKILLS

- **Languages:** Javascript (Typescript), Python, C/C++, SQL, Swift, HTML/CSS
- **Technologies:** React.js / React Native, Node.js, Redux, Flask, Unity, PsychoPy, JATOS
- **Cloud/DevOps:** AWS, Docker, Heroku, Kubernetes, Firebase, CI/CD pipelines

WORK EXPERIENCE

ROBLOX, *Game Engineer*, San Mateo, CA

Aug 2020 - Aug 2024

- Designed and engineered 10+ custom 3D game environments utilizing Blender and Roblox Studio, supplying developers with game maps for promoting their independent projects; improved average user engagement by over 70%
- Oversaw game asset development for Universal Studios Roblox, maximizing client profitability through in-game purchases, and helping the game reach over 80M+ player visits; programmed in-game experiences with Typescript

Major League Baseball, *Mobile Development & VR Intern*, New York City, NY

Mar 2023 - Aug 2023

- Delivered cross-platform features for Home Run Derby Mobile, preventing app crashes via automated testing
- Improved pitching physics and player model accuracy in Unity (C#)

Otea, *Frontend Engineering Intern*, (Remote) New York City, NY

June 2024 - Aug 2024

- Designed, created, and deployed mobile site / website for startup using ReactJS and Typescript in CI/CD environment; allowing brand to reach potential user and investor bases in NYC
- Implemented SCSS layouts for cross-device compatibility; secured signups with Firebase reCAPTCHA

Levy Neuroscience Decision Lab, *Programmer*, New Haven, CT (Yale)

Aug 2024 - Aug 2025

- Built 10+ interactive behavioral experiments in PsychoPy & React, deployed via JATOS
- Partnered with PhD researchers and lab heads to design data pipelines & optimize experimental protocols with intelligent data feedback

Rockefeller Neuroscience Institute, *Research Programming Intern*, Morgantown, WV

Jun 2025 - Aug 2025

- Created deep learning models for cortical speech prosthetics, decoding neural signals to speech
- Processed 1024+ EEG channels with MNE-Python, delivering an internal signal analysis app

PROJECTS

Yale Butteries (Project Lead) | *React Native, Redux, Node.js, Express, PostgreSQL, Docker*

Sept 2024 - August 2025

- Leading a team of 4 highly skilled developers in launching a complex, full-stack, mobile application for the Yale community; creating an order-ahead system for 14 student-run restaurants on campus (Butteries)
- Worked with Yale Administration to integrate app and payment handling into campus-wide usage
- Architected REST APIs, containerized services with **Docker**, and deployed on Heroku for scalable rollout.
- Designed and implemented complete front-end UI using React Native and built a Redux store to manage and update app state

Intelligent Music Discovery Engine | *Flask, NumPy, Scikit-learn, Spotify API*

Apr 2024

- Architected and deployed a full-stack recommendation service that modernizes legacy playlists by mapping them to semantically similar contemporary tracks via the Spotify Web API
- Built a feature-driven k-nearest neighbors retrieval pipeline over high-dimensional audio attributes (tempo, energy, valence), enabling low-latency similarity search
- Designed modular RESTful APIs in Flask for data ingestion, model inference, and recommendation delivery, supporting real-time user interaction

LEADERSHIP

Yale Admissions, *STEM Recruitment Leader*, New Haven, CT

August 2023 - Dec 2025

- Coordinated a team of 20 Yale students and Admissions Officers both budget and itinerary in the planning of Yale's YES Weekend
- Paired over 80 STEM likely letter recipients current Yale students, taking into account background and passions (~75% yield rate)
- Hosted 30+ global Q&A sessions for prospective students & families
